

## PHYSICAL GEOGRAPHY 12

***Credits: 4***

Geography is a course that recognizes and understands the systems and processes that shape God's creation. From mountains to rivers, weather to rainforests, students can learn to see and understand the dynamic systems of this planet. Topics covered include: features and processes of plate tectonics and their effects on human and natural systems • features and processes of gradation and their effects on human and natural systems • natural disasters and their effects on human and natural systems • climate, weather, and interactions between humans and the atmosphere • characteristics of global biomes, including climate, soil, and vegetation • natural resources and sustainability

Open to all grade 11 and 12 students.
